ARENA LED 810MM 12300LM 830 IP65 DALI PC 100W

DETAILED CARD

TECHNICAL PARAMETERS

Light source: LED module

Rated power of the luminaire [W]*: 100

Luminous flux [lm]*: 12300

Supply voltage [V]: 220-240

Luminous efficacy [lm/W]: 123

Energy efficiency class: D

Electrical protection class:

Colour temperature [K]: 3000

Impact resistance: IK09

Ingress protection: IP65

CHARACTERISTICS

The highly energy-efficient Arena Led lamp features a wide range of luminous flux from 8950 Im to 18400 Im. Such a wide range makes it possible to choose a version tailored to the requirements for lighting a room. The lamp body made of steel sheet, powder-coated in white, and the transparent polycarbonate diffuser provide it with a very high IK09 impact resistance factor. The lamp is also distinguished by a very high IP65 tightness, which allows it to be installed and work in dusty and high humidity conditions. It also meets the highest standards for lamps mounted in industrial premises. Its glare factor is UGR<22 and it is suitable for use with DIMM DALI control.

APPLICATION

Arena Led is designed for surface or pendant mounting inside facilities. Its characteristics and high value of impact resistance and tightness parameters predispose it to use in industrial halls and facilities with unfavorable conditions (increased dust and humidity, high probability of exposure to impact).

Arena Led lamps will also perform well in sports facilities. They will show resistance to the strongest impacts of the ball or other sports accessories.

ARENA LED 810MM 12300LM 830 IP65 DALI PC 100W
