

TOWER LITE MULTIBATTERY 68W (10285LM) - GREY

DETAILED CARD

TECHNICAL PARAMETERS

Index:	250255
Ingress protection:	IP20
Impact resistance:	IK07
Rated power of the luminaire [W]*:	68
Colour temperature [K]:	4000
Luminous flux [lm]*:	10285
Supply voltage [V]:	18
Electrical protection class:	III
Colour of the body:	grey
Diffuser material:	PC

CHARACTERISTICS

A set of compact floodlights providing even and stable directional illumination. The lamp body made from co-polymer with rubber for high durability. The lamps are fitted with an anti-glare frosted PC diffuser with UV stabiliser, allowing up to 80% of the light emitted by the LEDs to pass through, despite the matt surface, providing a soft and diffuse light. The set is set on a 2-metre stand allowing easy positioning of the light and selection of the right angle for the work surface. Kit equipped with an on/off switch with 4-stage light output adjustment. Lamp compatible with 18V batteries from manufacturers such as:

- directBosch (18V Professional),
- with a dedicated adapter: Makita, Milwaukee, DeWalt, Festool, Hikoki, Metabo (CAS), Hilti.

The unit has a battery discharge indication.

APPLICATION

Thanks to its various functions, the lamp is the ideal solution for illuminating all workplaces. The high luminous flux and maximum degree of impact resistance are particularly important for illuminating construction sites or intervening services at various emergencies. The lamp's design allows it to be used in the harshest of weather conditions. The multi-position arm provides a wide range of mounting options so that the light beam can be precisely directed, leaving the worker's hands free. Its small size and light weight make it easy to use in workshops, car showrooms, for lighting workplaces in industrial halls or finishing work.
