

FACTOR LED 1M 16000LM 840 90D IP66 (101W) C5-M

DETAILED CARD

TECHNICAL PARAMETERS

Index:	682001
Ingress protection:	IP66
Impact resistance:	IK09
Rated power of the luminaire [W]*:	101
Luminous flux [lm]*:	16000
Colour temperature [K]:	4000
Colour rendering index:	>80
SDCM:	≤ 3
Electrical protection class:	I
Energy efficiency class:	B

CHARACTERISTICS

Factor Led C5-M (very high corrosivity, marine and industrial environments) is the latest generation of high-powered floodlight with impressive lumen output. It is characterised not only by very high luminous efficiency, but also by high IP66 sealing and IK09 impact resistance. These parameters were achieved thanks to the branded components used, the robust housing made of cast aluminium LM-6 (aluminium-silicon alloy) and the use of a passive lamp cooling system, which allows excess heat generation to be dissipated during lamp operation. In the C5-M version, the paint coating plays an even more important role. The Factor Led has the advantage of being very quick and easy to install. The lightweight steel arm is attached to the supporting structure (wall, column) and then the light modules are plugged in. On one bracket, the installer can plug in a lamp containing 1 to 4 such modules.

APPLICATION

Very good sealing and impact resistance parameters, the ability to operate at elevated temperatures - up to 45°C as standard - and an extensive range of beam patterns predispose Factor Led lamps for use in difficult weather conditions. It can be used and performs excellently both inside industrial halls, warehouses, sports halls, logistics centres and outdoors - on sports pitches, airports, car parks, manoeuvring areas. It can also illuminate the facades of buildings and external architectural elements.
