**Electrical protection class:** 

Colour temperature [K]: 4000

Beam angle [°]: 90

#### **CHARACTERISTICS**

Recessed square LED luminaire with high total luminous Flux. Made of powdercoated white steel sheet. The luminaire has a patented HE reflector installed, which ensures efficiency and effectively eliminates glare. Available mounting versions: surface mounted, surface mounted on neodymium magnets (magnet ver. / N-MAG), flush-mounted in modular or KG ceilings (using an adapter), or suspended. In the surface-mounted version, solutions influencing the speed and safety of installation were used. In addition, the versions with neodymium magnets shorten the installation time of surface-mounted versions to an absolute minimum.

#### IoT characteristics

Variants available

IoT BT CAS DALI a built-in BT CAS module that allows you to program functions in the CASAMBI app and control in real time, and a DALI driver that allows you to dim

functions in the Lena Lighting Clue app and control in real time, and a **PWM** driver for dimming the light source. IoT BT HYT PWM BT HYT module (built into the driver) allowing you to program

**IoT BT PIR HYT DALI** a built-in **BT HYT** module that allows you to program functions in the Lena Lighting Clue app and control in real time; **PIR** motion and daylight sensor and **DALI** driver for dimming the light source.

IOT BT PIR HYT PWM BT HYT module (built into the driver) allowing for programming functions in the Lena Lighting Clue application and real-time control; PIR motion and daylight sensor and PWM driver for dimming the light source

IoT DS HYT 1-10V a built-in DS daylight sensor and a1-10V driver for dimming the light source.

#### **APPLICATION**

General-purpose recessed luminaire for indoor application in offices or other utility rooms. Appropriate as the main light source even when the work requires eyesight concentration.

UGR <19

Unified Glare Rating is an indicator characterizing glare. The lower the Unified Lighting Rating Index (UGR), the lower the glare. In the case of luminaires designed for office spaces, UGR <19, among, others improves the comfort of work, reduces errors and fatigue. The UGR value also depends on many factors characterizing the room and the location of the observer. Special computer programs should be used to precisely determine the degree of glare for specific conditions.
