CHARACTERISTICS

The surface, recessed or suspended (suspension system as accessories) mounted fixture equipped with energy-saving LED panels and a lens generating asymmetric light distribution. It was made of a powder-coated white RAL 9003 steel sheet. Shade – a PMMA iridescent lens of 85% light transmission assures high efficiency of the fixture. Available in two power options: 35W with a single LED Panel and 70W with a double LED panel. Colour temperature: 3000K or 4000K. The fixture's colour rendering index is CRI>80 and standard deviation colour matching (SDCM): ≤ 3, assuring homogeneity and uniformity of light. Suspension of the luminaire is possible, thanks to a special suspension system (accessories).

APPLICATION

The fixture is equipped with linear lenses assuring asymmetric distribution with a beam angle of 20° that is perfect for illumination of boards, paintings and display cases. An iridescent lampshade disperses light assuring that objects are uniformly illuminated with no light reflex. The fixture is applied mostly in schools, universities, museums and art galleries.
