EMERGENCY LIGHTING

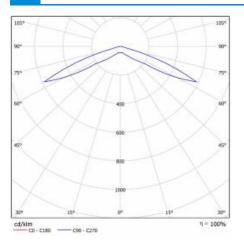

3216/2018

TECHNICAL PARAMETERS

Index: 550386 Ingress protection: IP65 Luminous flux [lm]*: 140 Colour temperature [K]: 5000 Material of the body: PC Emergency lighting [h]: 1 Battery: NiMh Autotest: yes Mounting version: surface

LIGHT CURVES

CHARACTERISTICS

Surface mounted autonomous emergency luminaire with integrated, energy-saving LED GO! light panel. Body made of polycarbonate (PC). Optical system available in 3 variants: basic, corridor, open space. Luminaire is fitted with batteries with 1h, 2h or 3h emergency operation time. The luminaire is using Ni-Mh or Ni-Cd battery with voltage of 3.6V and 24 hours of full charge with manual or automatic test function (AT).

Available versions: M - maintained, NM- non-maintained, AT - autotest.

APPLICATION

Autonomous emergency luminaire is mainly used for illumination of escape routes and fire protection devices after power failure, i.e. in emergency mode. Especially recommended everywhere, where it is necessary to install emergency lighting within the scope of modernization of existing system. Successfully replaces luminaires with embedded emergency module. Due to additional sealing, the luminaire achieves IP65 tightness and may be used in places with increased humidity or outdoors under the roofing.

CNBOP certificate: *Tolerance +/- 10%
