CHARACTERISTICS

Terraco is a luminaire with a modernist construction distinguished by its interesting minimalist design. The powder-coated steel body is available in four colour versions: silver, graphite, white and black. It offers a choice of different light distribution options, allowing it to be used in various applications, both: vertically and horizontally.

Installed on a building facade, it can distribute light downwards, upwards and sideways. It has a high ingress protection rating of IP54. It is designed for surface mounting.

***Light source not included.**

APPLICATION

Terraco is particularly suitable as exterior facade lighting, terrace, patio and balcony illumination. Its small dimensions expand the range of applications - it can light up alcoves and hard-to-reach areas. Terraco fittings can also be arranged in various ways to create interesting arrangements in buildings' interiors. The fitting allows a large number of interesting lighting concepts to be realised. It can be used to highlight contemporary architecture.
