

# ALTEZZO L 100 IOT

GENERAL CARD

## TECHNICAL PARAMETERS

Ingress protection:	IP65
Impact resistance:	IK08
Rated power of the luminaire [W]*:	6.00
Luminous flux [lm]*:	700
Colour temperature [K]:	3000
Colour rendering index:	>80
Beam angle [°]:	110
Light distribution type:	asymmetric
Dimensions (H/W/T/S) [mm]:	235/140/1200;
Mounting version:	on a foundation

## CHARACTERISTICS

Altezzo L 100 IoT is a family of outdoor lamps with a modern design. They are offered in four sizes - with heights ranging from 600 mm to 1500 mm. Their impact-resistant (IK08) and compact profile (100 mm x 40 mm) is made of aluminum in graphite color (RAL 7016). The light module consists of leds with a life span of up to 196,000 h, with lenses made of PMMA and a durable polycarbonate diffuser.

### IoT characteristics

Variants available:

**IoT BT HYT 1-10V. Bluetooth HYT** module controlled in the Lena Lighting Clue app, **1-10V** driver enabling dimming of the light source.

**IoT BT PIR HYT 1-10V. Bluetooth HYT** module controlled in the Lena Lighting Clue app, **PIR** motion and light sensor, **1-10V** driver enabling dimming of the light source.

## APPLICATION

The wide range of luminous fluxes in the Altezzo L 100 lamp series allows to design energy-efficient lighting in the amount required by the norm, both in walking alleys and building surroundings. Versions with lower wattages will work well in parks and gardens for illuminating small architecture.

The lamps are designed for operation in low and high temperatures from -30°C to +50 °C and in harsh weather conditions. They are characterized by a very high IP65 tightness.

### **Altezzo L 100 IoT - explanation of the different versions:**

The **IoT BT HYT 1-10V** version has a built-in **BT HYT** module that allows you to program functions in the Lena Lighting Clue app and control in real time, and a **1-10V** driver that allows you to dim the light source.

The **IoT BT PIR HYT 1-10V** version has: a built-in **BT HYT** module that allows you to program functions in the Lena Lighting Clue app and control it in real time; **PIR** motion and daylight sensor and **1-10V** driver for dimming the light source.

### **Details**

The selection of the foundation for the lighting column, in accordance with the Building Act, rests with the designer, with the relevant qualifications. The designer is also obliged to check the standard solution from the lighting manufacturer's offer, as he knows, among other things, the soil and water conditions in the designed area. If the dedicated foundation does not provide the safe conditions specified in the design, a suitable one should be selected from outside the lighting manufacturer's offer, with an anchor spacing of 180x180 - 220x220mm. As standard, in the case of **Altezzo L 100**, universal 13kg foundations are used for garden lamps or FBO 35/7.5 M6 foundations for taller posts and/or more difficult ground and water conditions.
