CHARACTERISTICS

Surface-mounted, universal (maintained or non-maintained system) emergency fitting with a low profile including an integrated, energy-saving LED light source. The base and the lampshade are made of high quality, V0 class polycarbonate PC, optional double-sided set DS(for pictograms illumination) for a version with flat cover – plate made of PMMA, frame made of steel, powder painted. NiCd battery with manual testing function included; battery life in the event of an emergency is 3h. Visibility 20m or 30m (double-sided set / DS version).

APPLICATION

Autonomous emergency fitting, dedicated for illumination of evacuation routes and emergency exits in the event of voltage drop in the power grid, i.e. in emergency mode. Product intended for surface mounting walls. Recommended particularly for areas of technical nature (passageways, staircases, garages, cellars) and for all applications which require the installation of permanent emergency lighting.
